Re: Site-Wide PCB Cleanup – Work Notification
Arkema Inc. -West Plant Property
Riverview Michigan

Dear Ms. Bury:

For your information, and in accordance with the EPA PCB Cleanup Plan approval letter of June 4, 2010, Arkema Inc. (Arkema) is providing notice of mobilization, remediation and restoration work for the PCB remediation at the West Plant Property. On or about November 7, 2011 our remediation contractor will be mobilizing to the site and remediation will begin immediately thereafter. It is anticipated that the on-site remediation work will last approximately two months and area restoration will be completed throughout the project.

The work will be completed in accordance with the approved Site-Wide PCB Cleanup Plan dated May 2010, and a report detailing the activities will be prepared at the completion of the on-site activities. The selected remediation contractor is EQ – The Environmental Quality Company of Wayne, Michigan and our consultant, Conestoga-Rovers & Associates (CRA) will be providing day to day oversight and reporting.

If you have any questions regarding the work, please contact me at (610) 878-6250.

Sincerely,

A handwritten signature in black ink, appearing to read "R. Wright", is positioned above the printed name.

Robert L. Wright
